

Gabriella P. Reyes

EDUCATIONAL CONSULTANT

Pembroke College Prep

PROFILE

I am an independent educational consultant who guides students to college success. I work with students to plan their high school careers, conduct meaningful passion projects and research publications, and navigate the college process—from list-building and essay writing to interviews and financial aid negotiations. I aim to help students find and gain acceptance to the college that's the right fit academically, socially, culturally, and financially.

I intentionally work with a small number of students each year to provide deeply personalized guidance—combining research and passion project development with thoughtful college advising under one roof. I strive to provide a much higher return on investment to my students than the big college consulting companies.
